NOTIFICATION DATE

DELIVERY MODE

04/18/2008

ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patents@VERIZON.COM

Office Action Summary	Application No. 10/720,868	Applicant(s) HELBLING ET AL.	
	Examiner THJUAN K. ADDY	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-4,9-18,21,22,24,26-31 and 34-37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-4,9-18,21,22,24,26-31 and 34-37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on February 07, 2008 has been entered. Claims 2-4, 9, 10, 15, 16, 21, 26, and 29-31 have been amended. Claims 1, 5-8, 19, 20, 23, 25, 32, and 33 have been cancelled. Claims 34-37 have been added. Claims 2-4, 9-18, 21, 22, 24, 26-31, and 34-37 are now pending in this application, with claims 10, 15, and 21 being independent.

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/07/2008 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-4, 9-18, 21, 22, 24, 26-31, and 34-37 are rejected under 35 U.S.C.

103(a) as being unpatentable over Elsey et al. (US Patent Application, Pub. No.: 2004/0184593 A1), in view of Thorpe et al. (US Patent Application, Pub. No.: 2006/0093120 A1), and further in view of Celik (US Patent Application, Pub. No.: 2007/0021111 A1).

4. In regards to claim 2, Elsey discloses the method, wherein receiving a request including identifying information comprises receiving a request including one of a name, a telephone number, or a network identifier (See pg. 10, paragraph [0103]).

5. In regards to claim 3, Elsey discloses the method, wherein receiving a request including identifying information comprises receiving a request including an e-mail address (See pg. 10, paragraph [0103]).

6. In regards to claim 4, Elsey discloses the method, wherein receiving a request including identifying information comprises receiving a request including one of an audio signal, a video signal, a photograph, or a digital image (See pg. 12, paragraph [0130]).

7. In regards to claim 9, Celik discloses the method, wherein automatically storing the contact information in the contact list is performed without user intervention (See pg.

1, paragraph [0006]; pg. 2, paragraph [0010]; pg. 2, paragraph [0012]; pg. 8, paragraph [0064]; and pg. 8, paragraph [0067]).

8. In regards to claim 10, Elsey disclose a method for obtaining contact information (See pg. 2, paragraph [0020]), the method comprising: receiving, by a service center (See Fig. 1 and directory assistance system 100), a request initiated by a user for contact information associated with a telephone number (See pg. 10, paragraph [0103] and pg. 12, paragraph [0130]). Elsey, however, does not disclose querying, by the service center and in response to the request, a directory for the contact information; querying, by the service center and in response to the request, an Internet search engine for the contact information, and receiving the contact information from at least one of the directory and the Internet search engine at the service center. Thorpe, however, does disclose querying (e.g., via operator at operator terminal 18), by the service center (See Fig. 1 and directory assistance system (DAS) 14) and in response to the request (e.g., caller's request), a directory (See Fig.1 and directory assistance database 20) for the contact information (e.g., number corresponding to a requested listing); querying, by the service center and in response to the request, an Internet search engine (See Fig. 5 and search engine 46) for the contact information; and receiving the contact information from at least one of the directory and the Internet search engine at the service center (See pg. 2, paragraph [0025] – [0026]; pg. 3, paragraph [0030]; and pg. 3, paragraph [0035]). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to incorporate these features within the method and system, as a way of enhancing directory assistance

automation by searching traditional directory assistance databases with independent listing and locality queries. Elsey nor Thorpe, however, disclose automatically storing, via the service center, the contact information in a contact list associated with the user in response to receiving the contact information at the service center. Celik, however, does disclose automatically storing, via the service center (See Fig. 1, Mobile Operator-Over-The-Air Communication Platform 1014, and Mobile Operator Network 1016), the contact information (e.g., name, mobile phone number, business phone number, home phone number, and email address) in a contact list (See Fig. 2 and address book module/phonebook module 2055) associated with the user (e.g., second user) in response to receiving the contact information at the service center (See pg. 1, paragraph [0006]; pg. 2, paragraph [0010]; pg. 2, paragraph [0012]; pg. 8, paragraph [0064]; and pg. 8, paragraph [0067]). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to incorporate this feature within the method and system, as a way of automatically inserting, updating, and maintaining contact information stored in a user's phonebook, thus providing less errors associated with manual data entry.

9. In regards to claim 11, Elsey discloses the method, wherein the telephone number for which contact information is requested includes a telephone number associated with a call received by the user (See pg. 4-5, paragraph [0049] and pg. 12, paragraph [0126]).

10. In regards to claim 12, Elsey disclose the method, wherein the telephone number for which contact information is requested includes a telephone number previously dialed by the user (See pg. 4-5 lines [0049] and pg. 12, paragraph [0127]).

11. In regards to claim 13, Elsey discloses the method, wherein the telephone number for which contact information is requested is specified by the user (See pg. 12, paragraph [0130]).

12. In regards to claim 14, Elsey discloses the method, further comprising: providing the user with access to the contact information (See pg. 2, paragraph [0020]).

13. In regards to claims 15, 21, and 27, Elsey discloses in a system having a user terminal (e.g., originating telephone, See Fig. 1), a service center (See Fig. 1 and directory assistance system 100), and a server (See Fig. 1 and DL/C database server 136), a method for obtaining contact information (See pg. 2, paragraph [0020]), the method comprising: receiving, by the service center, a request from the user terminal for contact information associated with a party, the request including identifying information associated with the party (See pg. 10, paragraph [0103] and pg. 12, paragraph [0130]); forwarding the request from the service center to the server; forwarding the at least one response from the server to the service center (See pg. 7, paragraph [0074] – [0075]); and providing a user with access to the contact information when the at least one response includes the contact information (See pg. 2, paragraph [0020]). Elsey, however, does not disclose transmitting, in response to the request, a query including the identifying information from the server to a directory and to an Internet search engine; receiving at least one response by the server from at least one of the directory

or the Internet search engine. Thorpe, however, does disclose transmitting, in response to the request (e.g., caller's request), a query (e.g., via operator at operator terminal 18) including the identifying information (e.g., number corresponding to a requested listing) from the server to a directory (See Fig.1 and directory assistance database 20) and to an Internet search engine (See Fig. 5 and search engine 46); receiving at least one response by the server from at least one of the directory or the Internet search engine (See pg. 2, paragraph [0025] – [0026]; pg. 3, paragraph [0030]; and pg. 3, paragraph [0035]). Elsey nor Thorpe, however, disclose automatically storing the contact information in a contact list maintained by the service center when the at least one response includes the contact information, wherein the contact list is associated with the user. Celik, however, does disclose automatically storing the contact information (e.g., name, mobile phone number, business phone number, home phone number, and email address) in a contact list (See Fig. 2 and address book module/phonebook module 2055) maintained by the service center (See Fig. 1, Mobile Operator-Over-The-Air Communication Platform 1014, and Mobile Operator Network 1016) when the at least one response includes the contact information, wherein the contact list is associated with the user (e.g., second user) (See pg. 1, paragraph [0006]; pg. 2, paragraph [0010]; pg. 2, paragraph [0012]; pg. 8, paragraph [0064]; and pg. 8, paragraph [0067]).

14. In regards to claim 16, Thorpe discloses the method, wherein transmitting a query including the identifying information from the server includes transmitting a query including a telephone number and an identifier associated with a user of the user

terminal (See pg. 2, paragraph [0025] – [0026]; pg. 3, paragraph [0030]; and pg. 3, paragraph [0035]).

15. In regards to claim 17, Elsey discloses the method, wherein the directory includes a directory assistance service maintained by at least one service provider (See pg. 7, paragraph [0074]).

16. In regards to claims 18 and 26, Elsey discloses the method and system, wherein providing the user with access to the contact information includes providing the user with access to at least one of a name, a street, a city, a state, a zip code, a facsimile number, or an e-mail address associated with the telephone number (See pg. 7-8, paragraph [0083] and pg. 10, paragraph [0101]).

17. In regards to claim 22, Elsey discloses the system, wherein the directory includes a directory assistance service maintained by at least one service provider (See pg. 7, paragraph [0074]).

18. In regards to claim 24, Elsey discloses the system, wherein the user device is one of a general purpose computer, a personal computer, a Blackberry device, a Ergo Audrey device, a wireless device, or a Personal Digital Assistant (See pg. 7-8, paragraph [0083]).

19. In regards to claim 28, Elsey discloses all of claim 28 limitations, except the system, wherein the service center stores the listing information in a contact list associated with the user. Celik, however, does disclose wherein the service center stores the listing information in a contact list associated with the user (See pg. 1,

paragraph [0006]; pg. 2, paragraph [0010]; pg. 2, paragraph [0012]; pg. 8, paragraph [0064]; and pg. 8, paragraph [0067]).

20. In regards to claim 29, Elsey discloses the system, wherein the response received by the first server from the at least one of the directory or the Internet search engine and forwarded to the service center indicates that information associated with the telephone number is not available to the public (See pg. 13, paragraph [0138]).

21. In regards to claims 30 and 36, Elsey discloses the system, wherein the response received by the first server from the at least one of the directory or the Internet search engine and forwarded to the service center indicates a billing type associated with the telephone number (See pg. 6, paragraph [0070]).

22. In regards to claims 31 and 34, Elsey discloses the system, wherein the response received by the first server from the at least one of the directory or the Internet search engine and forwarded to the service center includes at least one error message (See pg. 3, paragraph [0026] and pg. 13, paragraph [0138]).

23. In regards to claim 35, Thorpe discloses the method, where the query is in the form of a Universal Resource Locator (URL) (See pg. 2, paragraph [0025] – [0026] and pg. 3, paragraph [0035]).

24. In regards to claim 37, Thorpe discloses the method, where the contact related information includes information associated with more than one party (See pg. 1-2, paragraph [0011] and pg. 2, paragraph [0026]).

Response to Arguments

25. Applicant's arguments with respect to claims 2-4, 9-18, 21, 22, 24, 26-31, and 34-37 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

26. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zhang et al. (US 6,907,111) teach network and method for providing a name and number delivery telecommunications service with automatic speech recognition capability. Thorpe et al. (US 6,999,563) teach enhanced directory assistance automation. Velius (US 5,014,303) teaches operator services using speech processing.

27. Any inquiry concerning this communication or earlier communications from the examiner should be directed to THJUAN K. ADDY whose telephone number is (571)272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.

28. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (571) 272-7488. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2614

29. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
